Handouts

Handouts from the speakers will be posted on the NJ AWHONN website for review, download and printing as desired from two weeks prior to and four weeks after the conference.

Note: Printed copies of the speaker's slides will not be available the day of the conference.

Conference Purpose

The purpose of this activity is to enable the learner to gain current evidence based recommendations to reduce the incidence of preterm deliveries and knowledge regarding interventions to increase neonatal survival when preterm birth is unavoidable.

Disclosures

None of the planners and none of the speakers have any vested interest in the content of this continuing nursing education activity to disclose.

Objectives:

1. Discuss the significance of PTD on neonatal morbidity and mortality.
2. Discuss interventions for the prevention of preterm birth.
3. Discuss the ethical considerations surrounding preterm delivery.
4. List three important assessments when discussing palliative care options with parents.
5. Discuss a strategy to support women and families at risk for preeclampsia.
6. List the treatment modalities that are effective in reducing the preterm delivery rate.
7. Describe the interventions that have been shown to improve outcomes for premature infants.
8. Discuss the effectiveness of collaboration with multidisciplinary team members.
